COMPLETE COMMERCE SOLUTION BUILT AROUND YOUR CUSTOMERS

Customer Commerce.

BUILD YOUR BUSINESS AROUND YOUR CUSTOMERS, NOT CHANNELS.

Today's customers expect highly consistent and personalized shopping experiences, regardless of channel or touchpoint. Satisfying that desire builds loyalty, deepens relationships and grows your business. Yet most businesses don't have the infrastructure to provide an omnichannel customer view.

Usually, those companies are burdened with a mix of legacy systems and new channel technologies that are siloed and produce redundant data. They lack the real-time inventory visibility and order management across channels needed to offer customers a "buy anywhere, get anywhere" experience. Trying to synchronize critical inventory and customer data with customer-facing systems is almost impossible. The result: business inefficiency, customer frustration and brand discontent.

TRANSFORM YOUR BUSINESS

- Differentiate, adapt and bring innovation to your business faster
- Create uniquely branded and engaging shopping experiences optimized for any device
- Gain a single view of a customer across all channels for complete visibility into all online, in-store and call center activities
- Fulfill orders from multiple inventory locations to achieve optimal operational efficiency and customer satisfaction
- Streamline operations and eliminate costly, error-prone integrations between separate systems with a unified cloud commerce platform tied directly to your operational business systems
- Extend your footprint by selling through multiple brands and business models atop the same ecommerce platform
- Accelerate your speed of business across new channels, geographies and brands without purchasing additional licenses and investing in additional infrastructure

TODAY'S COMMERCE

Successful businesses have moved beyond the limits of individual channels and touchpoints to deliver true omnichannel shopping and service experiences. With an infrastructure that unifies business applications and the data that feeds them, it is possible to create seamless, channel-agnostic, personalized experiences.
